

## Traditional Drugs – Therapeutic Interchange List (Marketplace)

System	Condition	Therapeutic Class	Target <sup>∞</sup>	Alternative <sup>∞</sup>
Cardiovascular	Hypertension	Angiotensin Converting Enzyme Inhibitor	Captopril	Enalapril Benazepril Ramipril
		Angiotensin Converting Enzyme Inhibitor / Thiazide Diuretic	Benazepril – Hydrochlorothiazide	Enalapril – Hydrochlorothiazide Lisinopril – Hydrochlorothiazide Quinapril – Hydrochlorothiazide
		Angiotensin Receptor Blocker	Olmesartan	Valsartan
		Angiotensin Receptor Blocker / Thiazide Diuretic	Candesartan – Hydrochlorothiazide Olmesartan – Hydrochlorothiazide Telmisartan – Hydrochlorothiazide	Irbesartan – Hydrochlorothiazide Valsartan – Hydrochlorothiazide
		Beta-Blockers – Cardio Selective	Nebivolol	Acebutolol Atenolol Metoprolol Tartrate
		Beta-Blockers – Non-Selective	Nadolol	Pindolol Propranolol
		Calcium Channel Blockers	Verapamil ER Capsules Verapamil SR Capsules	Verapamil ER Tablets
	Hyperlipidemia	HMG-CoA Reductase Inhibitors	Rosuvastatin	Atorvastatin
		Fibric Acid	Fenofibrate Capsules/Tablets Fenofibrate Micronized	Gemfibrozil
	Acute Coronary Syndromes	Platelet Aggregation Inhibitors	Brilinta	Clopidogrel Prasugrel

∞ = Target and Alternative medications listed may not have the same mechanism of action and may simply be first line therapies for that condition. Ambetter from Sunshine Health encourages use of generics as first-line therapy; however, these are suggestions that may not be clinically appropriate for all members.

~ = Prior Authorization required

± = Medications removed from the Ambetter formulary effective 1/1/2024. If a drug is removed from the list of covered drugs, it means that you will need to prescribe an alternative product or will have to provide documentation that the medication is medically necessary and, in some cases, that other most cost-effective medications have already been tried and were not effective.

Abbreviations: CD = controlled-delivery, ER = extended-release, ODT = orally disintegrating tablets

Last Updated: 1/2024

System	Condition	Therapeutic Class	Target <sup>∞</sup>	Alternative <sup>∞</sup>
Gastrointestinal	Miscellaneous Gastrointestinal Condition	Antispasmodics/Anticholinergic	Chlordiazepoxide-Clidinium Capsules	Dicyclomine Capsules Dicyclomine Tablets
	Crohn's Disease / Ulcerative Colitis	5-Aminosalicylic Acid Derivative	Mesalamine DR	Balsalazide Disodium Sulfasalazine
	Gastroesophageal Reflux Disease	Proton Pump Inhibitors	Dexilant <sup>±</sup> Esomeprazole Rabeprazole	Omeprazole DR Lansoprazole DR Pantoprazole
Neurologic	Seizures	Anticonvulsants	Aptiom	Carbamazepine Oxcarbazepine Tablets
			Dilantin Dilantin Suspension Dilantin Chewables	Phenytoin Phenytoin Sprinkles Phenytoin Chewables
			Tegretol Tegretol Suspension	Carbamazepine Carbamazepine Chewable Carbamazepine ER Carbamazepine Suspension
